FAQ

Can I use this app off campus?
The streaming services are provided by your university; the app will only let you stream while your device is connected to your campus network.

I have multiple devices so which one can I download the app?
You can put the app on all your devices; however, the system will let you use only one device at a time.

I'm on campus and the app is not working.
Check to see that you’re connected to your campus WiFi network (as opposed to the phone network, for instance). If you are and you’re still having difficulty, contact your school’s helpdesk.
